About Us.

Introduction

We are working to build a cleaner, smarter, and more sustainable energy ecosystem for Bangladesh. Our vision brings together renewable energy, rooftop solar, battery energy storage, and electric transportation to reduce dependence on fossil fuels and support the country's transition toward a greener future.

We are developing solutions that connect clean energy generation with modern transportation, including sustainable EV charging and energy-storage infrastructure. At the same time, we provide professional rooftop solar installation and solar energy solutions for homes, businesses, and other facilities, helping customers make better use of renewable power.

Our goal is not simply to install solar panels or develop electric vehicles, it is to create an integrated renewable-energy ecosystem where clean power, storage, and electric mobility work together.

Xeltra Energy - Powering Clean Transportation. Building a Renewable Energy Future.

Mission & Vision.

MISSION

- Leading sustainable EV charging infrastructure in Bangladesh through innovation and commitment
- Our mission is to create a smart, accessible, and eco-friendly energy ecosystem, reducing Bangladesh's reliance on fossil fuels while boosting the nation's commitment to a greener and more sustainable future.

VISION

- Xeltra Energy's vision is to build Bangladesh's first mobile energy platform, using rooftop solar, lithium-ion battery storage, and electric delivery vehicles to provide reliable, zero-emission power on demand.

IMPACT THESIS

- Accelerate EV adoption in Bangladesh
- Cut urban air pollution and fossil fuel dependence
- Increase daily income for millions of 3 wheeler drivers
- Build climate-aligned infrastructure at national scale.

Our Solution.

What Xeltra Delivers

Xeltra Energy Bank charges lithium-ion battery energy-storage units from a factory or warehouse rooftop solar plant, then delivers those units to customer sites as a clean, quiet, fully mobile power service. We start with a 10,000 - 15,000 sft rooftop solar charging station and 3 portable units targeting 130 kWh capacity each

Xeltra Energy Bank each Vehicle

- 130KW storage system Pickup Van.
- 16 batteries & 1 fast charger setup.
- 48V 100Ah Battery with Smart BMS & GPS (each)

Charging Station Formats

- 210 Solar Panels (620W Each)
- On Site Backup Storage System
- 3 Fast charger
- 3 van with storage system charging facility.

Contribution.

CMB CHITTAGONG

CUMILLA BSIC

KHULSHI, CTG

CHANPUR CUMILLA

We are contributing to a cleaner and greener Bangladesh by expanding the use of rooftop solar energy across communities and businesses. Through our solar installations in Chittagong, Cumilla, Khulshi, and Chanpur, we help replace conventional electricity sources with clean, renewable power.

By increasing access to solar energy, we aim to reduce dependence on fossil fuels, lower carbon emissions, and help prevent CO₂ from entering the environment, while supporting a more sustainable energy future for Bangladesh.

Our Achievement.

**EV Charging Station license
applied from SREDA.**

SIDE VIEW

HERITAGE MODERNISM

Inspired by the heritage pedal rickshaw of Bangladesh, Ecotrike EVX1 preserves the familiar cultural form while replacing conventional propulsion with modern electric mobility. We electrify the heritage design to help keep the character of Bangladesh's rickshaw tradition alive.

PRODUCT HIGHLIGHTS

- 100% Electric
- Driver + 2 Passengers
- Rear Wheel Drive
- 1200 W BLDC Motor
- Lithium-ion Battery
- Smart BMS with heat sensor
- Battery options: 48V 100Ah to 48V 150Ah
- 4-6 hour charging
- Maximum speed: 35 km/h loaded

- Range: 80-100 km per charge*
- Maximum load: up to 320 kg
- Gradeability: up to 12%
- 2.5 mm heavy-duty steel tubular chassis
- Telescopic hydraulic front fork
- Rear leaf spring / hydraulic shock absorbers
- Front disc brake
- Rear drum brake
- 3.00-18 steel spoke wheels
- Weather-resistant canopy
- Reinforced fiberglass body
- LED headlamp and indicators
- Digital speedometer

SOLAR-POWERED CHARGING

Charged through Xeltra Energy's Solar-Powered Charging Station. Clean-energy charging infrastructure designed to support Ecotrike electric mobility.

Let's Build a Greener Tomorrow, Together.

Have a project, an idea, or a vision for clean energy? Let's turn it into reality.

From rooftop solar and energy solutions to sustainable electric mobility, Xeltra Energy is ready to help you take the next step toward a cleaner, smarter future.

Connect with us. Let's power the change together.
